1. An organizational chart of the Soviet construction bureaus in Luensdorf, a location sketch of the barracks installations in Luensdorf, and four construction drawings for buildings No 94a, 41 and 72 were examined. *
2. Building No 94a allegedly is to become the headquarters of an army commander. The name of Chuikov (phonetic spelling) was mentioned in connection with this building. The construction of the walls in rooms No 71 and 65 on the second floor of building No 94a is noteworthy. These walls have a layer of reinforced concrete. Both rooms are accessible only through anterooms and are provided with individual toilets. Room No 71 is built in such a way as to make the installation of a teletype and telephone system possible. Room No 65 is believed to be reserved for the chief of staff. A connection to building No 94 exists on this floor only. The staircase planned on the ground floor was walled up. The basement is equipped with steel safes, probably for filing documents. **

~~[REDACTED]~~ For organizational chart of the construction bureaus, see Annex 1. For location plan of the barracks installations in Luensdorf, see Annex 2. For photostats of construction drawings of buildings No 94a, 41 and 72, see Annex 3.

** ~~[REDACTED]~~. The belief that a high-echelon headquarters is to be set up in Luensdorf is possible. In late December 1950, ~~[REDACTED]~~ reported that the local burgomaster's office was to prepare billets for 10 generals from early February 1951 onward. ~~[REDACTED]~~ 25X1X
